

POWER CONDITIONING

CAPACITOR NETWORK ASSEMBLY

- Navy Depot Application

Espey Mfg. have designed and manufactured power distribution system components ranging from power distribution centers to capacitor networks, to transmission line surge suppressors up to 500kV. Espey's design experience and manufacturing capability enable functional products in quantities of 1 to 1000.

Specifications:

Electrical Specifications

- **Operating Voltage:** 270VDC
- **Current Limited:** 5 ohms, 2700W

Mechanical Specifications

- NEMA Grade 3R Enclosure
- Sealed Enclosure lockable, and interlocked
- Pressure Relief Device

Features:

- Total Capacity: 1.08F
NOM at 25°C
- Individual Capacitor Sections fused and fitted with bleeders
- Charge/Voltage Indicators

EB-300-CN
