

POWER CONDITIONING

EMI FILTER

115V, 60Hz - Naval Shipboard

Espey Mfg. designed and manufactures this filter assembly for a prime military contractor. Proven power conditioning equipment through system experience and high power capabilities provide the working knowledge to implement the most challenging designs.

FILTER INDUCTOR

Features:

- Power line filter
- Dual, isolated, single phase circuits
- 7.5 Amp Rating
- For system level compliance to MIL-STD-461 and MIL-STD-1399

Specifications:

ELECTRICAL SPECIFICATIONS

- Rated Voltage:
- 115VAC, 60Hz, Single Phase - DUAL
- Rated Current: 7.5A per line
- Attenuation: (Available by request)

MECHANICAL SPECIFICATIONS

- Hermetically/EMI Sealed

SE-15-F
